2. The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious an spectrometer apparatus comprising: a corrective optics device comprising (i) a wedge-shape prism and (ii) a focusing device intermediate the sample supporting surface and the prism such that the prism is adjacent a focus of the optical system and arranged to increase the accuracy of imaging of the surface of the sample, in combination with the rest of the limitations of the claim. (See Remarks, pp.4-5, filed on 11/30/2007).

Claims 4-8 are allowed by the virtue of dependency on the allowed claim 1.

As to claim 9, the prior art of record, taken alone or in combination, fails to disclose or render obvious an spectrometer system including comprising: a radiation transparent window for supporting a sample on a surface; a corrective wedge-shape prism and an imaging lens located between the prism and the window, and wherein the prism is located in the path of radiation to correct focal plane orientation such that it lies closer to the surface of the window, in combination with the rest of the limitations of the claim. (See Remarks, pp.4-5, filed on 11/30/2007).

As to claim 10, the prior art of record, taken alone or in combination, fails to disclose or render obvious an spectrometer system comprising: a radiation transparent window for supporting a sample on a surface; and an optical system for directing radiation onto the sample through the window at an angle to the normal to the window surface and for receiving radiation reflected from the sample through the window, wherein the apparatus includes a corrective wedge-shape prism and an imaging lens located between the prism and the window, and wherein the prism is located in the path of radiation to correct anamorphic magnification at the surface of the window, in combination with the rest of the limitations of the claim. (See Remarks, pp.4-5, filed on 11/30/2007).
